Art Unit: 3771

The drawings are objected to under 37 CFR 1.83(a) because they fail to show a “camera” (claim 9), a “microphone” (claim 8), at least one “sensor” (claim 7), a “pressure transducer” (claim 15) and a “gas composition sensor” (claim 16) as claimed and described in the specification. The structural details specified in the claims should be shown or the claim canceled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim 5 is object to as including a minor informality; delete the second “.” at the end of the sentence.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,6 and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Jackson' 151.

The Jackson reference discloses a tube 10 for introducing gases into a patient comprising a perforated zone including perforations or ports (proximate reference numeral 24 in Fig. 1) for the introduction gases and inflatable/deflatable sleeve 22.

In regard to claims 10-13, the method as claimed would be inherent during normal use and operation of the device.

In regard to claim 11, the limited insertion is inherent and implied during normal use of the tube.

In regard to claims 12-14, it is implied that any medical procedure would be continuously monitored.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Normori and Moore references pertain to other gas tubes with associated inflatable sleeves.

Art Unit: 3771

Claims 2,4,5,7-9,15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
